## **DETAILED ACTION**

### ***Terminal Disclaimer***

1. The terminal disclaimer filed on 6/19/2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US 7,087,680 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Claim Rejections - 35 USC § 112***

2. Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 1 (and claims 2-5 as dependent thereon) the melting point has been amended to be at least 166.0°C for a propylene homopolymer having an Mw/Mn of less than 5 and a melt flow rate less than 7. However, the specification fails to provide support for a homopolymer of this type. The only mention of the temperature point "166.0°C" is in the homopolymer of Example 3; however, this example fails to meet the claimed Mw/Mn or MFR. Since this example is clearly not within the scope of the claims, it cannot provide support for the claimed polymer.

3. Claims 8-11, 16 and 21-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) Claim 10 is indefinite because it depends from cancelled claim 12.

(b) Claims 8 and 16 (and claims 9, 11 and 21-25 as dependent thereon) are indefinite because the claims are internally inconsistent regarding the presence of ethylene. The preamble recites that the polypropylene is a homopolymer, yet the formula expressly allows for the inclusion of an ethylene fraction. Accordingly, it cannot be determined if the error is in the preamble description, or in the inclusion of an ethylene component in the formula and description.

4. In view of the fact that all claims have been newly amended and have been rejected on new grounds of lack of enablement and indefiniteness, consideration of the IDS filed 7/5/2007 will be deferred until the next office action.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 1713

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
